Designs with vision.

Develops with strategy.

Obsesses over impact

A Front-End Engineer bridging the gap between sci-fi concepts and technical reality. Applying a "deep-work" immersion mindset to engineer high-stakes projects that deliver a genuine "WOW".

Education and Certification

Kwantlen Polytechnic University (KPU) | Richmond, BC

Diploma in Front-End Development for Interactive Applications (FDIT)

Graduation: May 2026

Tri-Council Policy Statement: Ethical Conduct for Research Involving Humans (TCPS 2: CORE 2022)

Skills

UI/UX Research & Design: Qualitative Methodologies (Usability testing, Interviews, etc.), Insight Synthesis, Stakeholder Communication, Figma (Autolayout, Components, Variables, etc.), Visual Design Fundamentals, Design Decision Rationale, Annotated Wireframing and Prototyping, Developer Handoff.

Development Skills: Semantic HTML & Modern CSS, JavaScript (ES6+), CSS Library (Tailwind), JavaScript Framework (React), Git Version Control, Responsive Design, Reading Design Files, Documentation.

Tools: FigJam, Figma, Framer, Survey Monkey, Google Forms, Jira, Gemini (for Research), Visual Studio Code, npm, DevTools, GitHub, Github Copilot.

Languages: English (*Proficient*), Hindi (*Native*), Punjabi (*Native*).

Student Projects

1. UI/UX Projects and Roles:

City of Vancouver | [UX Research and UI Design](#)

[Case Study Link](#)

- Elevated the System Usability Scale score from 65% to 75% by redesigning the core web interface to align with accessibility standards and modern UI patterns using **Figma**.
- Optimized the site's **Information Architecture** for specific user personas by conducting a content audit that reduced cognitive load and eliminated redundant elements.
- Collaborated with a classmate for conceptualization, research and development.

Ascend | [UI Design](#)

[Case Study Link](#)

- Maximized user engagement by architecting a mobile-first design system in **Figma** that utilizes motion design and micro-interactions to reinforce positive user behaviors.
- Bridged the gap between design and development by translating a Figma-based design system directly into a **React** logic-state machine, ensuring pixel-perfect implementation of complex gamification features.
- Collaborated with a classmate for research and development.

Adidas Revamped | UX Research and Responsive Design

[Case Study Link](#)

- Restructured website **Information Architecture** based on 7 user interviews, reducing cognitive load by addressing navigation friction.
- Engineered a scalable, responsive homepage interface adaptable to any screen size by utilizing **Figma's** Auto Layout to build modular components .

2. Front-End Development Projects:

E.D.I.T.H. | Front-End Development and AI Back-End

[GitHub Link](#)

- Developed a **Gemini**-powered AI agent to automate data entry and documentation for Jira tickets, tracking build process in GitHub and collaborating on Slack.
- Accelerated administrative workflows by reducing ticket creation time by **50%**.
- Engineered a high-performance, responsive chat interface using a modular architecture with **React** Hooks and **Tailwind** CSS.

Ascend | Front-End Development

[Demo](#) / [GitHub Link](#)

- Engineered a custom logic-state machine in **React** to manage a "Reward-Loop" system, synchronizing EXP, currency, and task completion metrics across the UI.
- Designed a scalable backend infrastructure capable of handling dynamic user progress data by leveraging **Supabase** for database management and authentication APIs.
- Collaborated with a classmate for research and design.

City of Vancouver | Front-End Development

[Demo](#) / [GitHub Link](#)

- Modernized public data accessibility for the **City of Vancouver** by engineering an 'Indicator Page' that parses raw JSON datasets into interactive **ECharts** visualizations.
- Enabled seamless, real-time data filtering without page reloads by writing optimized **JavaScript** logic to dynamically update chart instances and DOM elements.
- Ensured **85% design fidelity** during implementation by collaborating with UX partners to validate the technical feasibility of data visualization concepts.

Experience

Build Bliss Construction Ltd. | Framing Carpenter

Nov 2024 - Present

- Collaborated effectively with cross-functional teams to ensure timely project completion and adherence to specifications.
- Demonstrated strong time-management and communication skills in a high-demand construction environment, balancing responsibilities with full-time studies.
